Re: P.I.E. (Program Information Exchange)
Date: October 13, 2015

On Tuesday, October 13th , I attended the P.I.E. (Program Information Exchange) meeting at the Nassau Library System. The attendees were required to bring at least five examples each of programs that worked and programs that did not work. This meeting was a great chance to meet other programming librarians from libraries around Long Island who were able to offer many suggestions of programs they have offered that were both successful and unsuccessful in their libraries. I was able to receive many good suggestions for potential programs and I also made a note of the programs that I may not want to offer in the future. This meeting was a great opportunity to meet and network with other programming librarians and to receive helpful program ideas.

Thank you!

Nicole Mollick-Polaski
